

Virtual Battle Space III (VBS III)

Purpose of Trainer:

The Virtual Battle Space III provides GEO Specific terrain that allows users to train in an immersive, first-person environment that supports mounted and dismounted operations. The system provides ground and air vehicles, small arms and vehicle-mounted weapons, communications, and interactive opposing forces of the contemporary operational environment, including improvised explosive devices. Soldiers, Leaders and Trainers can use VBS3 to rehearse tactical missions and conduct after action reviews of training sessions using easy-to-use tools integrated in the simulation.

Prerequisite: A train-up on system operation is required for Soldiers prior to actual training.

Note: Fort Leonard Wood, TSC is equipped with (1) VBS III system, located in Building 1230, Caisson Drive.
